NEW AINSLEY 2013

Power Lift Recliner

NEW AINSLEY

Motion Recline with Lift Capability
Standard size available in 19-5/8" (498mm)

Styling & Design

- "The ultimate" in reclining chairs with near zero wall capability
- Spring loaded ottoman
- Maximum seat elevation with superb stability in full lift position
- Easy to use hand control
- Wide stance construction provides greater side to side stability
- Unitized system for greater strength, durability and rigidity

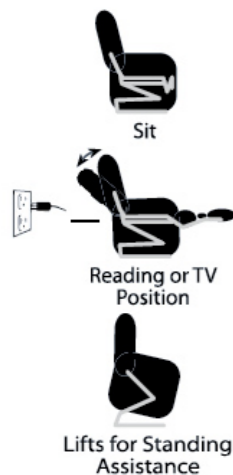

NEW AINSLEY

Performance & Engineering

- Fits same frame as manual zero wall, glider or rocker
- Durable steel base and cross supports
- Finger tip motion control with infinite recline positions
- Optional K.D. back system for easy back removal and handling
- Engineered bushings and washers at pivot points provide quiet smooth operation and durability
- Direct drive activation synchronizes right and left sides for easy opening
- All Omega series mechanisms are interchangeable in the same frame if the frame is constructed per the Rocker frame prints.

LEGGETT & PLATT QUALITY

Leggett & Platt and Shann Australia are so confident in the quality of our lift mechanism that we offer a 2 year warranty from the date on your purchase on the mechanism.

Perhaps the greatest testament to the popularity and the quality of Leggett & Platt mechanisms is the constant industry effort to duplicate the product, and although it is regularly copied, it is never replicated. Established in 1883, Leggett & Platt has been designing and manufacturing furniture products for more than 100 years, continually elevating the quality and innovation in everything it sells. Leggett & Platt mechanisms are manufactured to exacting standards and uncompromised quality.

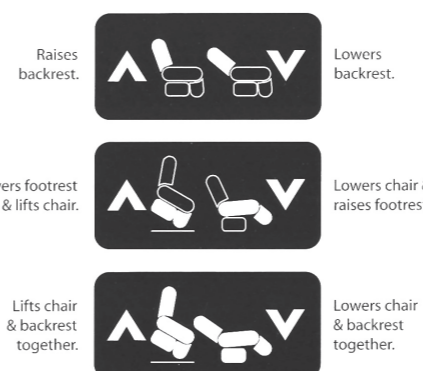

2 MOTOR LIFT MECHANISM

Some of the features of the mechanism you have selected are:

- Spring-loaded footrest for added safety
- Heavy gauge construction for strength and durability
- Critical rivet joints use heavy-duty metal bushings for maintenance free rotating action
- Separately-located power supply ensures only low voltage power reaches the chair
- Power supply has a battery backup function to return the recliner to the upright position
- Electrical system has the thermal overload safety cutouts to prevent overheating and is maintenance-free
- Handset is spill-resistant
- Electrical components conform to Australian mains-voltage compliance regulations

Leggett & Platt products are subject to a LP900 quality accreditation which is more stringent than the commonly quoted ISO9000.

OPERATING INSTRUCTIONS

BATTERY BACKUP

The battery backup feature enables the lift chair to be powered to the raised position (once only) in the event of a power failure.

To enable the battery backup, fit 2 x 9V batteries (not supplied) to the compartment underneath the power supply.

Replace the batteries if the lift chair has been used during a power failure.

AFTER SALES SERVICE

There is no other lift mechanism supplier in Australia and New Zealand that can offer after sales service like Shann. If you experience a warranty issue in metro Brisbane, Sydney, Darwin, Melbourne, Gold Coast, Adelaide, Perth or Auckland, Shann can send an experienced technician to your home to assess or replace your mechanism depending on the problem. This service eliminates the costly exercise of returning your mechanism to the retailer and saves considerable time in having your mechanism fixed.

Sturdy Framac pursue a policy of continuous improvement and reserve the right to introduce modification when required and to withdraw models without previous notification.
